Comprehensive Assistance Package for Ukraine

OBJECTIVE

Consolidating and enhancing NATO's assistance for Ukraine in reforming its Armed Forces according to NATO standard and achieving their interoperability with NATO forces by 2020

SCOPE

Strategic level advice on defence and security sector reform and institution building

> 40 targeted support measures in key areas

Tailored support measures

Capacity and institution building

Goal: Strengthening democratic oversight, promotion of security and defence institution reforms, as well as improvement of Ukraine's professional military education system.

How it works: Assistance will be provided through NATO's leading capacity and capability building programmes for partners, as well as the Military Career Transition Trust Fund led by Norway.

Command Control, Communications and Computers (C4)

Goal: Re-organising and modernising Ukraine's C4 structures and capabilities to facilitate their interoperability with NATO and enhance Ukraine's ability to provide for its own defence and security.

How it works: Implementing the set objectives will be facilitated by the projects developed under the C4 Trust Fund led by Canada, Germany and the United Kingdom. Additionally, the Regional Airspace Security Programme (RASP) will improve Ukraine's ability to handle air security incidents.

Logistics and Standardization

Goal: Establishment of a coherent, coordinated and effective integrated logistics support system with a focus on the improvement of Ukraine's supply chain and standardization management capability.

How it works: Strategic objectives formulated at the policy level will be furthered through the Partnership Goals of the Planning and Review Process and by projects under the Logistics and Standardization Trust Fund led by the Czech Republic, the Netherlands and Poland.

Defence Technical Cooperation

Goal: Enhancing materiel interoperability between Ukraine and NATO as well as Ukraine's codification capability.

How it works: Ongoing work under the Joint Working Group on Defence Technical Cooperation as well as a project under the Logistics and Standardization Trust Fund will contribute to the CAP in this area.

Cyber Defence

Goal: Providing support for the implementation of Ukraine's new Cyber Security Strategy approved in 2016.

How it works: As part of the CAP, the Cyber Defence Trust Fund led by Romania will contribute equipment and training to enhance Ukraine's capabilities to handle cyber security incidents.

Energy Security

Goal: Supporting the protection of critical infrastructure through exchanging best practices, training and exercises.

How it works: Implementation of the relevant projects will be led by the NATO Energy Security Centre of Excellence in Vilnius, Lithuania.

Medical Rehabilitation

Goal: Establishment of an effective medical support system for Ukrainian Armed Forces, based on Euro-Atlantic experience.

How it works: With Bulgaria as lead nation, the Medical Rehabilitation Trust Fund is assisting Ukraine in raising the standards and long terms sustainability of its medical rehabilitation services for wounded servicemen and women, as well as in capability development for medical rehabilitation institutions.

Counter-Improvised Explosive Devices, Explosive Ordnance Disposal and Demining

Goal: Building capacity and capabilities for handling threats from improvised explosive devices and unexploded ordnance.

How it works: Activities in this area will be developed by a designated Trust Fund on Counter-

Improvised Explosive Devices and Explosive Ordnance Disposal. Legacy challenges stemming from military activities of the Soviet Army in Ukraine will continue to be addressed under two trusts funds led by the USA and Germany.

Security-related science

Goal: Addressing a wide variety of emerging security challenges such as counter-terrorism, advanced technologies, cyber defence energy security, and defence against chemical, biological, radiological and nuclear (CBRN) agents.

How it works: NATO's Science for Peace and Security Programme, which has Ukraine as its major beneficiary, will contribute to activities under the CAP in this area. As a flagship project under the CAP, Ukraine's capacity in the sphere of telemedicine and paramedicine will be developed.

Strategic Communications

Goal: Establishment and development of strategic communications capabilities of the Defence Forces of Ukraine.

How it works: NATO will support capability development in this area benefiting government institutions as well as civil society including through implementation of the NATO-Ukraine Strategic Partnership Communications Roadmap.

Countering Hybrid Warfare

Establishment of a platform for identifying lessons-learned from hybrid war in Ukraine.

Security Services Reform

Assisting the reform of the Security Service of Ukraine with a particular attention to ensuring civilian democratic control.

Civil Emergency Planning

Assisting the State Emergency Service of Ukraine in building capacity and capabilities in civil protection and humanitarian assistance.
